SUMMARY

Cybersecurity Analyst with hands-on experience in security operations, incident response, and defensive security engineering within healthcare environments. Experienced investigating ransomware Incidents, phishing campaigns, security alerts, and endpoint threats while deploying SIEM, EDR, and identity security solutions. Combines 2 years of cybersecurity operations experience with 6 years of technical IT experience, utilizing Splunk, Microsoft Sentinel, SentinelOne, KQL, SPL, and PowerShell automation to strengthen detection and response capabilities.

CERTIFICATIONS

CompTIA Security+, Network+, CySA+, CSAP, ITF+

SKILLS

Security Operations: Microsoft Sentinel, Splunk, SentinelOne EDR, Wazuh SIEM, GoPhish, VirusTotal

Cloud & Identity: Entra ID, Active Directory, Intune, RBAC, MFA, Email Forensics (SPF/DKIM/DMARC)

Automation/Scripting: PowerShell, Python, Bash

Networking & Infra: pfSense, WireGuard, VLANs, Firewalls, VPN Management

GRC & Vulnerability: NIST CSF/800-53, Nessus, HIPAA, PCI-DSS, DRP/AUP/SOP

Detection Engineering: SPL, KQL, IOC enrichment, alert tuning

Incident Response: Endpoint isolation, forensic triage, phishing analysis, ransomware response

CYBERSECURITY EXPERIENCE

FMRS Health Systems – Cybersecurity Analyst / IT Specialist – Beckley, WV

Nov 2024 – Present

- **Incident Response & Triage:** Responded to a Qilin ransomware incident involving compromise of an internet-facing firewall service; performed security triage, supported endpoint isolation, analyzed indicators of compromise, and assisted recovery and remediation efforts.
- **Email Security & Threat Analysis:** Investigated and remediated 30+ phishing campaigns, analyzing headers, URLs, and payloads while extracting IOCs and improving email security controls.
- **SIEM & Storage Architecture:** Deployed and configured a production Splunk SIEM environment on Linux infrastructure, designing log ingestion pipelines across 150+ endpoints and developing centralized visibility for security monitoring and threat investigation.
- **Endpoint & Agent Automation:** Engineered custom PowerShell deployment scripts executed via NinjaOne RMM to automate fleet-wide security agent rollouts across 150+ endpoints.
- **Identity & Access Management (IAM):** Hardened identity security posture by implementing least privilege principles and RBAC controls for 300+ users in Entra ID.

- **Security Awareness & Phishing Mitigation:** Developed GoPhish simulations and automated remediation workflows using custom HTML training pages to improve employee phishing awareness.
- **Governance, Risk, & Compliance (GRC):** Supported accreditation readiness by authoring Disaster Recovery Plans (DRP), Acceptable Use Policies (AUP), and healthcare security SOPs.
- **Vulnerability Management & Threat Intel:** Conducted vulnerability triage and threat hunting using SentinelOne, Splunk, VirusTotal, and AlienVault OTX to investigate security findings and support remediation efforts.

TECHNICAL & COMPLIANCE EXPERIENCE

Alpha Engineering Services – Engineering Analyst – Mabscott, WV
Oct 2023 – Feb 2024

- **Data Parsing & Compliance:** Parsed, sorted, and analyzed complex technical datasets to optimize airflow metrics, maintaining strict alignment with regulatory compliance and safety standards.

Ibex Global – Production Support – Beckley, WV
May 2019 – Oct 2023, Feb 2024 – Nov 2024

- **Privacy & IAM:** Enforced PCI-DSS and HIPAA data protection controls across sensitive PII/PHI environments; managed user access controls and identity provisioning across enterprise and hybrid infrastructures.
- **Root-Cause Analysis:** Conducted root-cause investigations on complex system escalations, streamlining operational workflows and reducing recurring incidents.

EDUCATION

West Virginia Junior College – Associate of Applied Science in Cybersecurity (Honors) Graduated

PROJECTS

- **Local LLM & MISP Threat Intelligence Pipeline:** Built an automated threat intelligence framework integrating MISP, Splunk, and a local LLM to ingest IOCs and post real-time AI-analyzed threat alerts to Discord.
- **GoPhish:** A practical phishing simulation setup using GoPhish to improve security awareness. Includes custom phishing email templates, a mock Microsoft login page, and an educational landing page. Hosted on a Linux server and designed to help organizations identify and train users against phishing attacks.
- **Azure Free Tier Honeypot + Microsoft Sentinel Logging:** Deployed an exposed cloud honeypot environment to capture live adversary telemetry and built custom KQL queries in Microsoft Sentinel to analyze attack trends and IP origins.
- **Email Security & Malware Analysis Lab:** Conducted static and dynamic analysis of malicious email payloads, extracted indicators of compromise (IOCs), and documented findings to support threat investigation and detection improvements.
- **Enterprise Vulnerability Management & Nessus Lab:** Deployed and configured Nessus Professional in an isolated lab environment to execute authenticated and unauthenticated vulnerability scans across Windows and Linux hosts; analyzed scan telemetry to identify critical CVEs, misconfigurations, and missing patches, authoring prioritized remediation reports based on CVSS scoring and risk context.
- **Infrastructure Modernization:** Built and deployed modern web infrastructure and network configurations for local small businesses and non-profit organizations.
- **Community Outreach:** Organized and participated in technical charitable initiatives, utilizing 3D printing workflows to manufacture custom resources for children in need.
